Proteins

The tryptic peptides of rabbit muscle triose phosphate isomerase.
By P. H. Corran & S. G. Waley 1

Studies on the subunit structure and amino acid sequence of triose phosphate isomerase from chicken breast muscle.
By A. J. Furth, J. D. Milman, J. D. Priddle & R. E. Offord 11

Appendix: The use of mass spectrometry to complement conventional techniques for protein sequence determination.
By J. D. Priddle 23

Non-histone chromosomal proteins. Evidence for their role in mediating the binding of histones to deoxyribonucleic acid during the cell cycle.
By G. S. Stein, G. Hunter & L. Lavie 71

Mössbauer effect in the eight-iron ferredoxin from *Clostridium pasteurianum*. Evidence for the state of the iron atoms.
By C. L. Thompson, C. E. Johnson, D. P. E. Dickson, R. Cammack, D. O. Hall, U. Weser & K. K. Rao 97

Mössbauer effect in the high-potential iron–sulphur protein from *Chromatium*. Evidence for the state of the iron atoms.
By D. P. E. Dickson, C. E. Johnson, R. Cammack, M. C. W. Evans, D. O. Hall & K. K. Rao 105

Affinity labelling of the binding site of rabbit antibody. Evidence for the involvement of the hypervariable regions of the heavy chain.
By C. E. Fisher & E. M. Press 135

Purification and characterization of the seven cyanogen bromide fragments of human serum transferrin.
By M. R. Sutton & K. Brew 163

The selective isolation of an active-site histidine peptide from chymotrypsin-α by diagonal peptide 'mapping'. An N^{π}-carboxymethylhistidine diagonal peptide 'map'.
By K. J. Stevenson 215

Effect of pH on thermal stability of collagen in the dispersed and aggregated states (*Short Communication*).
By A. E. Russell 277

PAGE

Partial amino acid sequence in the *N*-terminal region of an anti-pneumococcal immunoglobulin heavy chain of allotype a_2 (*Short Communication*).
By J.-C. Jaton & J. Haimovich 281

Nucleic Acids

Characterization of ribonucleic acids from the venom glands of *Crotalus durissus terrificus* (Ophidia, Reptilia) after manual extraction of the venom. Studies on template activity and base composition.
By F. L. De Lucca, M. T. Imaizumi & A. Haddad 151

Fractionation of nucleic acids from *Penicillium chrysogenum* and associated ribonucleic acid viruses by selective exclusion and retention in agarose gels.
By S. L. Petrović, B. D. Šumonja & R. B. Vasiljević 157

Modified messenger ribonucleic acid release from isolated hepatic nuclei after inhibition of polyadenylate formation.
By D. E. Schumm & T. E. Webb 191

Lipids

Characterization of plasma lipoproteins separated and purified by agarose-column chromatography.
By L. L. Rudel, J. A. Lee, M. D. Morris & J. M. Felts 89

Carbohydrates

Hexose phosphate synthetase from *Methylococcus capsulatus* makes D-*arabino*-3-hexulose phosphate.
By M. B. Kemp 129

Structural investigations on the lignin–carbohydrate complexes of *Lolium perenne*.
By I. M. Morrison 197

Small Molecules

Reactions of L-ergothioneine and some other aminothiones with 2,2′- and 4,4′-dipyridyl disulphides and of L-ergothioneine with iodoacetamide. 2-Mercaptoimidazoles, 2- and 4-thiopyridones, thiourea and thioacetamide as highly reactive neutral sulphur nucleophiles.
By J. Carlsson, M. P. J. Kierstan & K. Brocklehurst 221

PAGE

A convenient spectrophotometric assay for the determination of L-ergothioneine in blood.
By J. Carlsson, M. P. J. Kierstan & K. Brocklehurst 237

Enzymology

The enzymology of adenosine triphosphate sulphurylase from spinach leaf tissue. Kinetic studies and a proposed reaction mechanism.
By W. H. Shaw & J. W. Anderson 27

Comparative enzymology of the adenosine triphosphate sulphurylases from leaf tissue of selenium-accumulator and non-accumulator plants.
By W. H. Shaw & J. W. Anderson 37

Reduction and inactivation of superoxide dismutase by hydrogen peroxide.
By R. C. Bray, S. A. Cockle, E. M. Fielden, P. B. Roberts, G. Rotilio & L. Calabrese 43

The mechanism of action of superoxide dismutase from pulse radiolysis and electron paramagnetic resonance. Evidence that only half the active sites function in catalysis.
By E. M. Fielden, P. B. Roberts, R. C. Bray, D. J. Lowe, G. N. Mautner, G. Rotilio & L. Calabrese 49

Purification and specificity of a human microsomal epoxide hydratase.
By F. Oesch 77

The kinetic mechanism and properties of the cytoplasmic acetoacetyl-coenzyme A thiolase from rat liver.
By B. Middleton 109

The effects of two disulphides on cholinesterase activity in the spectrophotometric assay.
By K.-B. Augustinsson & H. Eriksson 123

The amine oxidases of human placenta and pregnancy plasma.
By W. G. Bardsley, M. J. C. Crabbe & I. V. Scott 169

PAGE

The inhibition of human placental diamine oxidase by substrate analogues.
By M. J. C. Crabbe & W. G. Bardsley 183

Some properties and a suggested reclassification of mevaldate reductase.
By A. S. Beedle, H. H. Rees & T. W. Goodwin 205

Nitrogenase of *Klebsiella pneumoniae*. Inhibition of acetylene reduction by magnesium ion explained by the formation of an inactive dimagnesium–adenosine triphosphate complex.
By R. N. F. Thorneley & K. R. Willison 211

Stimulation of microsomal uridine diphosphate glucuronyltransferase by glucuronic acid derivatives.
By D. A. Vessey & D. Zakim 243

The lactate dehydrogenase–reduced nicotinamide–adenine dinucleotide–pyruvate complex. Kinetics of pyruvate binding and quenching of coenzyme fluorescence.
By J. Südi 251

Macroscopic rate constants involved in the formation and interconversion of the two central enzyme–substrate complexes of the lactate dehydrogenase turnover.
By J. Südi 261

The reaction of *Pseudomonas aeruginosa* cytochrome *c* oxidase with sodium metabisulphite (*Short Communication*).
By S. R. Parr, M. T. Wilson & C. Greenwood 273

Intermolecular Organization

Protein synthesis in the cotyledons of *Pisum sativum* L. Protein factors involved in the binding of phenylalanyl-transfer ribonucleic acid to ribosomes.
By G. N. Wells & L. Beevers 61

Polyphenol–protein interactions (*Short Communication*).
By E. Haslam 285

Contents of Volume 139, No. 2

PAGE

Proteins

The specificity of chain interactions among immunoglobulins. Combinations of γ chains with κ chains of the same subgroup as in the parent immunoglobulin G.
By G. T. Stevenson & L. E. Mole 369

An investigation by dielectric methods of hydration in myoglobin solutions.
By E. H. Grant, B. G. R. Mitton, G. P. South & R. J. Sheppard 375

PAGE

Navy (haricot)-bean (*Phaseolus vulgaris*) lectin. Isolation and characterization of two components from a toxic agglutinating extract.
By A. T. Andrews 421

Carcinoembryonic-antigen-like substances of human urothelial carcinomas. Isolation of components from pathological urine and comparison with colorectal carcinoma antigens.
By R. Nery, A. L. Barsoum, H. Bullman & A. M. Neville 431

GENERAL BOOKBINDING CO.
160AA 013 C 3575
74 2 1 1
QUALITY CONTROL MARK

PAGE

The purification and amino acid sequence of cytochrome *c*-552 from *Euglena gracilis*.
By G. W. Pettigrew 449

Age-related variations in hydroxylation of lysine and proline in collagen.
By M. J. Barnes, B. J. Constable, L. F. Morton & P. M. Royce 461

Lipids

Endogenous steroid concentrations in human breast tumours determined by high-resolution mass fragmentography (*Short Communication*).
By D. Millington, D. Jenner, T. Jones & K. Griffiths 473

Carbohydrates

Identification of *N*-acetyl-4-*O*-acetylneuraminyl-lactose in echidna milk.
By M. Messer 415

Small Molecules

Useful agents for the study of glutathione metabolism in erythrocytes. Organic hydroperoxides.
By S. K. Srivastava, Y. C. Awasthi & E. Beutler 289

Isolation and structure of nocobactin NA, a lipid-soluble iron-binding compound from *Nocardia asteroides*.
By C. Ratledge & G. A. Snow 407

Enzymology

Pig liver pyruvate carboxylase. Purification, properties and cation specificity.
By G. B. Warren & K. F. Tipton 297

Pig liver pyruvate carboxylase. The reaction pathway for the carboxylation of pyruvate.
By G. B. Warren & K. F. Tipton 311

Pig liver pyruvate carboxylase. The reaction pathway for the decarboxylation of oxaloacetate.
By G. B. Warren & K. F. Tipton 321

PAGE

Kinetic and molecular properties of citraconylaldolase. The reversible denaturation and hybridization of the native and modified enzymes.
By I. Gibbons & R. N. Perham 331

Subunit interactions in hybrids of native, carboxypeptidase-treated and citraconylated rabbit muscle aldolase.
By I. Gibbons 343

Specific inhibition of the enzymic decarboxylation of *S*-adenosylmethionine by methylglyoxal bis(guanylhydrazone) and related substances.
By A. Corti, C. Dave, H. G. Williams-Ashman, E. Mihich & A. Schenone 351

The interaction of α_2-macroglobulin with proteinases. Binding and inhibition of mammalian collagenases and other metal proteinases.
By Z. Werb, M. C. Burleigh, A. J. Barrett & P. M. Starkey 359

Inhibitors of rabbit plasma prostaglandin A isomerase.
By R. L. Jones 381

A comparison of purified valyl-transfer ribonucleic acid synthetase from *Bacillus stearothermophilus* and from *Escherichia coli*.
By S. Wilkinson & J. R. Knowles 391

Purification and properties of malyl-coenzyme A lyase from *Pseudomonas* AM1.
By A. J. Hacking & J. R. Quayle 399

Biospecific affinity chromatography of an adenosine 3′:5′-cyclic monophosphate-stimulated protein kinase (protamine kinase from trout testis) by using immobilized adenine nucleotides.
By B. Jergil, H. Guilford & K. Mosbach 441

Purification of α-mannosidase from jack-bean meal suitable for use as reagent (*Short Communication*).
By C. Y. T. Chu & M. D. Turner 469

Studies on glucarate catabolism: the oxodeoxyglucarate aldolase activity of glucarate hydrolyase from *Pseudomonas acidovorans* (*Short Communication*).
By R. Jeffcoat 477

Contents of Volume 139, No. 3

PAGE

Proteins

Structural membrane proteins and loosely associated proteins of the sarcoplasmic reticulum.
By A. Margreth, U. Carraro & G. Salviati 509

PAGE

The reactivity of the disulphide bonds of wool.
By H. Lindley & R. W. Cranston 515

Haem ligands of the ferricytochrome *c* of *Ustilago sphaerogena*.
By S. N. Vinogradov, K. G. Bitar & S. Lowenkron 547

PAGE

The amino acid sequence of plastocyanin from *Solanum tuberosum* L. (potato).
By J. A. M. Ramshaw, M. D. Scawen, C. J. Bailey & D. Boulter 583

Adrenocorticotrophic and melanocyte-stimulating peptides in the human pituitary.
By A. P. Scott & P. J. Lowry 593

Uptake and release of ferritin iron. Surface effects and exchange within the crystalline core.
By T. G. Hoy, P. M. Harrison & M. Shabbir 603

Molecular-weight estimates of milk-fat-globule-membrane protein–sodium dodecyl sulphate complexes by electrophoresis in gradient acrylamide gels.
By M. Anderson, T. Cawston & G. C. Cheeseman 653

The use of radiolabelled T_1 ribonuclease to monitor the efficiency of Edman degradations (*Short Communication*).
By D. J. McKean & G. P. Smith 779

Interaction of aldolase with the troponin–tropomyosin complex of bovine muscle (*Short Communication*).
By F. M. Clarke, C. J. Masters & D. J. Winzor 785

Histidine residues and the enzyme activity of pig heart supernatant malate dehydrogenase (*Short Communication*).
By J. J. Holbrook, A. Lodola & N. P. Illsley 797

Nucleic Acids

X-ray evidence for metal–N-7 bonding in a hydrated manganese derivative of guanosine 5′-monophosphate (*Short Communication*).
By P. de Meester, D. M. L. Goodgame, T. J. Jones & A. C. Skapski 791

Lipids

Triterpenoid carotenoids and related lipids. The triterpenoid carotenes of *Streptococcus faecium* UNH 564P.
By R. F. Taylor & B. H. Davies 751

Triterpenoid carotenoids and related lipids. Triterpenoid monohydroxy- and monoglucosyloxy-carotenoids from *Streptococcus faecium* UNH 564P.
By R. F. Taylor & B. H. Davies 761

The isolation of cholest-5-ene-3β,26-diol from human brain (*Short Communication*).
By A. G. Smith, J. D. Gilbert, W. A. Harland & C. J. W. Brooks 793

PAGE

Carbohydrates

The relationship of root-cap slimes to proteins.
By K. Wright & D. H. Northcote 525

Chemical and physical properties of an arabinogalactan-peptide from wheat endosperm.
By G. B. Fincher, W. H. Sawyer & B. A. Stone 535

Studies of the polysaccharide fraction from the lipopolysaccharide of *Pseudomonas alcaligenes*.
By J. A. Lomax, G. W. Gray & S. G. Wilkinson 633

Peptidoglycan biosynthesis by preparations from *Bacillus licheniformis:* cross-linking of newly synthesized chains to preformed cell wall (*Short Communication*).
By J. B. Ward & H. R. Perkins 781

Small Molecules

A fluorimetric method for the determination of tryptophan in animal tissues.
By M. K. Gaitonde 625

Enzymology

Purification and regulatory properties of phosphoribulokinase from *Hydrogenomonas eutropha* H 16.
By A. T. H. Abdelal & H. G. Schlegel 481

The equilibrium constant of the phosphoglyceromutase reaction.
By J. B. Clarke, M. Birch & H. G. Britton 491

A kinetic study of pig liver pyruvate kinase activated by fructose diphosphate.
By N. MacFarlane & S. Ainsworth 499

The reaction of an α-aza-amino acid derivative with chymotrypsin and its use as a ligand for covalent affinity purification.
By S. A. Barker, C. J. Gray, J. Ireson, R. C. Parker & J. V. McLaren 555

Preparation of adenosine nucleotide derivatives suitable for affinity chromatography.
By I. P. Trayer, H. R. Trayer, D. A. P. Small & R. C. Bottomley 609

A kinetic evaluation of monoamine oxidase activity in rat liver mitochondrial outer membranes.
By M. D. Houslay & K. F. Tipton 645

The use of deoxyfluoro-D-galactopyranoses in a study of yeast galactokinase specificity.
By P. Thomas, E. M. Bessell & J. H. Westwood 661

PAGE

The preparation and properties of pyruvate kinase from yeast.
By D. A. Fell, P. F. Liddle, A. R. Peacocke & R. A. Dwek 665

The identification of intermediates in the reaction of pig heart lactate dehydrogenase with its substrates.
By J. R. Whitaker, D. W. Yates, N. G. Bennett, J. J. Holbrook & H. Gutfreund 677

Studies on the heparin sulphamidase activity from rat spleen. Intracellular distribution and characterization of the enzyme.
By Y. Friedman & C. Arsenis 699

Iron and aconitase activity.
By O. Gawron, A. Waheed, A. J. Glaid, III & A. Jaklitsch 709

The direct linear plot. A new graphical procedure for estimating enzyme kinetic parameters.
By R. Eisenthal & A. Cornish-Bowden 715

PAGE

Statistical considerations in the estimation of enzyme kinetic parameters by the direct linear plot and other methods.
By A. Cornish-Bowden & R. Eisenthal 721

The isolation and properties of phenylalanine hydroxylase from rat liver.
By S. S. Gillam, S. L. C. Woo & L. I. Woolf 731

The isolation and properties of phenylalanine hydroxylase from human liver.
By S. L. C. Woo, S. S. Gillam & L. I. Woolf 741

Purification and subunit analysis of wheat-germ ribonucleic acid polymerase II.
By J. J. Jendrisak & W. M. Becker 771

A spectrophotometric assay of β-lactamase action on penicillins (*Short Communication*).
By S. G. Waley 789

Intermolecular Organization

Hyaluronic acid in cartilage and proteoglycan aggregation.
By T. E. Hardingham & H. Muir 565
